

This course will train users to manage the architecture, operation and expansion of your Vergence solution. In this 3-day instructor-led course, participants will:

- gain in depth knowledge of Vergence features including Single Sign-On and Context Management
- understand Vergence application integration including CCOW-enabled applications, Sentillion Bridges and use of the Credential Agent
- gain hands on experience installing and configuring Vergence Vaults and using the Import Users tool
- install private and shared clinical desktop environments with Authenticator and Launchpad
- develop an Authenticator logon script to provide custom resource access for each user
- configure default and custom roles for Launchpad
- add Launchpad tabs for CCOW-enabled, Bridged and Citrix published applications
- configure error logging and email notifications

**Course Prerequisites**

- Experience with shell scripting
- Completion of initial Vergence implementation
- Access to a Vergence test environment including a Vergence Vault and clean desktop images for workstation installation

**Advanced Vergence Administrator Course Agenda**
