

Vergence®

Advanced Vergence Application Integration Course

This course will train users to further expand the rollout of their Vergence solution by adding additional applications using Sentillion's BridgeWorks application integration toolkit. Participants in the 2.5-day lecture-lab Advanced Vergence Application Integration course will:

- gain hands on experience with the BridgeWorks integration toolkit
- learn how to integrate Windows, web and terminal-based applications
- develop their own Single Sign-On Bridge
- upgrade a Single Sign-On Bridge by adding Patient Context Sharing
- collaborate with experienced integration engineers to review their target applications and plan their expansion

Course Prerequisites

- Experience with scripting or programming and familiarity with basic application concepts such as HTML and Windows controls
- Identification and access to candidate applications for integration
- Vergence solution is live with initial Bridges
- Familiarity with context management concepts and experience configuring users and applications using the Vault Administrator tool.
- Access to a Vergence test environment including development workstations and a test Vault

Advanced Vergence Application Integration Course Agenda

Day 1	Day 2	Day 3
<ul style="list-style-type: none"> • Introduction • BridgeWorks Overview • BridgeBuilder • Case Study: Windows Application • Lab: SSO Bridge for Windows 	<ul style="list-style-type: none"> • Case Study: Web Application • Lab: SSO Bridge for Web • Case Study: Custom BridgeBuilder scripts • Lab: Custom BridgeBuilder script 	<ul style="list-style-type: none"> • Case Study: BridgeBuilder for Terminals • Lab: Customer applications • Lab: IdMPOWER Bridges
