

proVision™

## Advanced proVision Implementation and Administration Course

This course will train users to manage the architecture, operation and expansion of your proVision solution. Participants in this 3-day lecture-lab course held at Sentillion's Corporate Training Facility in Andover Massachusetts will:

- gain in depth knowledge of proVision features
- understand proVision's integration with Microsoft Active Directory
- gain hands on experience managing proVision components including Master Configuration files, databases, security and disaster recovery strategies
- configure a new application for provisioning
- define Roles and Approvers for applications
- enable a proVision Bridge
- configure Automated Provisioning
- create and populate an auditing/reporting database

### Course Prerequisites

- Experience with Java, XML, JScript, Microsoft SQL Server database administration and Active Directory administration
- Completion of initial proVision implementation
- Access to a proVision test environment including a proVision server, development workstations and test database
